CAREER SNAPSHOT

Software delivery: Angular, TypeScript, internal web applications and production support.

Systems background: IT operations, application environments, infrastructure, documentation and troubleshooting.

Business context: Fintech, CRM, customer support, compliance workflows and MBA-level perspective.

PROFESSIONAL PROFILE

Software Developer with 3+ years of Angular/TypeScript development experience and 7+ years across fintech operations, IT support, application support and customer-facing business systems at Hello Group, a South African company providing digital banking, international calling and remittance services. Contributed to production internal systems covering bank customer support, compliance management and employee management. Progressed from customer support into IT operations and software development, bringing practical understanding of how enterprise systems are built, maintained, supported and used. Strong in Angular, TypeScript, REST API integration, production support and technical documentation, with active full-stack growth in NestJS, PostgreSQL and Docker.

CORE SKILLS

Frontend: Angular (Signals, Standalone Components), TypeScript, RxJS, React, Svelte, Custom Elements, Shadow DOM, HTML5, CSS3, Tailwind CSS, Bootstrap, Angular Material

Backend & API: Node.js, Express.js, Java (Spring Boot), REST APIs, MongoDB, MySQL, PHP, Postman

DevOps & Tooling: Git, GitHub, Docker (Basic), GitHub Actions (Basic CI/CD), VS Code, Vite, Angular CLI, Linux

Currently Building: NestJS, PostgreSQL, Prisma ORM, JWT/RBAC, Swagger/OpenAPI, Jest, Playwright

IT & Domain: VMware vSphere, ESXi, Microsoft Intune, ManageEngine, ConnectWise, Spiceworks; fintech, CRM, compliance, production support and technical documentation

WORK EXPERIENCE

Software Developer | Hello Group | Centurion, South Africa | Sep 2022 - Apr 2026

Hello Group provides digital banking, international calling and remittance services across Southern Africa.

- Contributed to three production internal applications - Bank Customer Support CRM, Compliance Management System (CMS) and Employee Management System (EMS) - used daily by banking support, compliance and HR operations teams.
- Built and maintained Bank CRM frontend features for customer case management, account lookups and transaction-related ticket handling; integrated with Node.js/Express and Java Spring Boot backend services.
- Developed CMS frontend features for compliance officers, including case filtering, status tracking, assignment workflows and audit trail views.
- Contributed to the EMS built on PHP and JavaScript, covering employee records, leave management and HR workflows.
- Managed production support across all three applications by triaging bug reports, applying fixes and supporting application stability in a live environment.
- Collaborated with product managers, business analysts and operations teams to gather requirements, define acceptance criteria and support feature delivery.
- Maintained technical documentation for all three applications, supporting handover and internal knowledge sharing.

Technologies: Angular, TypeScript, RxJS, Node.js, Express.js, Java (Spring Boot), MongoDB, MySQL, PHP, JavaScript, Tailwind CSS, Bootstrap, Git, Jira, Confluence, Bitbucket, GitHub.

IT Specialist - Technical Operations & Application Support | Hello Group | Centurion, South Africa | Sep 2020 - Sep 2022

- Maintained IT infrastructure and application environments supporting internal development and business teams.
- Administered VMware vSphere/ESXi virtualisation environments and supported service availability across multiple VM environments.
- Served as a bridge between development and IT infrastructure by translating application requirements into environment configurations and tooling support.
- Supported software deployment, system monitoring, performance tuning and application lifecycle activities.
- Produced technical documentation and runbooks for infrastructure and application procedures.

Junior IT Technician | Hello Group | Centurion, South Africa | Jun 2018 - May 2020

- Provided first and second-line technical support to company staff through Spiceworks, ManageEngine and ConnectWise help desk platforms.
- Managed hardware and software asset records across the full lifecycle; installed and configured hardware and software.
- Supported security certificate compliance and educated staff on network security practices and responsible computer usage.
- Coordinated daily help desk activity and mentored junior technicians.

Call Center Consultant | Hello Group | Centurion, South Africa | Jun 2017 - Jun 2018

- Managed inbound and outbound customer calls for international calling and financial products; updated customer accounts and escalated complex cases appropriately.
- Built firsthand knowledge of fintech customer journeys, remittance workflows and bank service operations - context that later informed CRM design decisions as a developer.

PROJECTS & PORTFOLIO

Developer-as-a-Platform | sadikul.me | github.com/sad1kul/Developer-as-a-Platform

Tech: Angular, TypeScript, React, Svelte, Custom Elements, Shadow DOM, Tailwind CSS, RxJS, Angular Signals, Vite

Architectural portfolio built as a micro-frontend developer workbench. Angular shell hosts React and Svelte engines as Web Custom Elements with Shadow DOM isolation. Includes an interactive module workbench with filtering, sorting and Angular Signals state management, plus business-domain case studies drawn from CRM and fintech support workflows. Source code is linked from the UI for technical review.

Fintech Support & CRM Workflow Platform | In Development

Tech: Angular, NestJS, PostgreSQL, Prisma ORM, JWT/RBAC, Swagger, Docker Compose, GitHub Actions, Jest, Playwright

Full-stack fintech support platform extending patterns from production CRM work at Hello Group. Planned scope covers customer search, transaction dispute ticket lifecycle, role-based access control, audit logs, Swagger/OpenAPI documentation, Docker Compose local environment, CI/CD pipeline and automated test coverage. Live demo URL will be added after deployment.

EDUCATION

Master of Business Administration (MBA) | Richfield Graduate Institute of Technology (Pty) Ltd - South Africa | 2023 - 2026

BSc Honours in Information Technology | Richfield Graduate Institute of Technology (Pty) Ltd - South Africa | 2022 - 2023

BSc in Information Technology | Richfield Graduate Institute of Technology (Pty) Ltd - South Africa | 2021 - 2022

Diploma in Information Technology | Richfield Graduate Institute of Technology (Pty) Ltd - South Africa | 2018 - 2021

PROFESSIONAL DEVELOPMENT

Actively strengthening full-stack delivery through NestJS, PostgreSQL, Prisma, JWT/RBAC, Swagger/OpenAPI, Docker Compose, GitHub Actions and Playwright testing.
